

Week 3 Rubrics

std	P (Proficient)	S (Sufficient)	D (Developing)	I (Insufficient)	N (No evidence)
3.1	Conditionals used appropriately with clear logic AND uses comments explain program flow AND program runs without error.	Implements correct if/elif/else logic for simple cases AND program runs without error.	Minor syntax errors but logic is recognizable.	Misordered conditions, unreachable code, or flawed logic.	No conditionals.
3.2	Uses layered logic effectively in a multi-step program AND demonstrates clear reasoning using comments AND code executes without errors.	Correctly implements conditional logic in a moderate program structure AND code executes without errors.	Minor syntax issues or mis-nesting, but overall logic is on track.	Incorrect flow, flawed condition design, or misapplied operators.	No conditionals.
3.3	Creates correct nested conditionals AND uses comments to articulate how nesting affects execution AND program executes error-free.	Uses nested conditionals correctly in functional code AND program executes error-free.	Correct idea but code contains minor syntax or indentation errors.	Logic incorrect, nesting unnecessary or misstructured.	No nesting.
