Outcome 12 Rubrics

std	P (Proficient)	S (Sufficient)	D (Developing)	I (Insufficient)	N (No evidence)
12.1	Creates and effectively uses multiple instances of custom classes in a cohesive program AND demonstrates how objects interact by correctly invoking methods that call other custom classes AND explains the design with comments and appropriate naming conventions	Creates and effectively uses multiple instances of custom classes in a cohesive program AND demonstrates how objects interact by correctly invoking methods that call other custom classes.	Minor syntax errors in object creation or usage, but the overall structure is correct. (eg. calling the wrong method, spelling errors)	Incorrect instantiation, misuse of objects, or logical errors when managing multiple instances.	No use of multiple objects.
12.2	Correctly implements and calls constructor and instance methods AND writes methods that incorporate control flow (loops or conditionals) to determine object behavior based on internal state AND explains the design with comments and appropriate naming conventions	Correctly implements and calls constructor and instance methods AND writes methods that incorporate control flow (loops or conditionals) to determine object behavior based on internal state.	Minor errors in conditional syntax or structure, but overall intent is clear.	Incorrect conditional logic or misunder-standing of how state affects behavior.	No use of conditional logic within methods.
