Outcome 7 Rubric

std	P (Proficient)	S (Sufficient)	D (Developing)	I (Insufficient)	N (No evidence)
7.1	Implements correct iteration gathering data according to pattern AND returns correct values AND explains approach using comments and appropriately named function AND program executes error-free.	Implements correct iteration gathering data according to pattern AND returns correct values AND program executes error-free.	Minor syntax mistakes but correct logic OR prints output rather than returns values.	Incorrect iteration OR misuse of list operations OR patterns are inappropriate for the problem.	No attempt or partial/ incomplete solution.
7.2	Implements correct iteration gathering data according to formula AND returns correct values AND explains approach using comments and appropriately named function AND program executes error-free.	Implements correct iteration gathering data according to formula AND returns correct values AND program executes error-free.	Minor syntax mistakes but correct logic OR prints output rather than returns values.	Incorrect iteration OR misuse of list operations OR patterns are inappropriate for the problem.	No attempt or partial/ incomplete solution.
7.3	Full pipeline implemented correctly (iteration → extraction → aggregation → application) AND clear explanations using comments appropriately named functions.	Completes extraction AND aggregation correctly.	Completes extraction OR aggregation correctly, but with only minor syntax issues in the other.	Incorrect logic or extraction or aggregation.	No attempt or partial/ incomplete solution.
